

What are Community Challenges?

With individual small steps we can change the world. By working together we can transform it.

We are asking *livesimply* network members to think of actions that you as a parish, community or association, can work together on that will make a difference to our world. We call them "Community Challenges".

How you can get started

It's really easy. Just follow these simple steps:

1. Think about the communities to which you belong - it could be a small one like the florists at church, or a big one like a high school - and bring the community together.
2. Together, reflect on the gifts you have, and think about the things you are passionate about and the organisations you would like to support.
3. Look at the list of Community Challenges on the website www.livesimply.ie and choose your favourite Community Challenge. Each challenge has its own page with everything you need to get involved.
4. Alternatively think up your own Community Challenge. Your challenge should be practical, relevant in stopping climate change and something that everybody in the community can do.
5. Celebrate your success! Take photos, write an article, send them in to us and to your local diocesan paper. Email it to us at progressio@eircom.net
